Branch- Aerospace (1st year)

Academic Year- 2025-26

Date- 28th March 2026

Project Introduction

Scenario: You have just been selected as a Student Digital Ambassador at your college. Your role is to help your peers navigate the digital world — from creating professional online profiles, to communicating safely and responsibly online. Your first assignment is to build a Digital Literacy Portfolio that you will present to the faculty committee and share with your batch.

Overview: Now in order to fulfil the duties as the Student Digital Ambassador, we have been assigned 5 tasks in total and by performing these tasks we will not only learn about digital literacy but will also spread knowledge about the same. This process includes developing infographics, quizzes, building professional accounts and many more. Alongside these tasks we will be noting down our observations and hence forming a summarised project report. At the end of the project we will be well versed in the different aspects of digital literacy which affect our day to day lives.

Task1 - Create a Digital Literacy Awareness Infographic

For creating this infographic I have used Canva (www.canva.com), this website offers a variety of templates where we can customise it according to our own need and style. The reason I have chosen this design because it is futuristic and the colour palette is eye catching which even helps in developing the interest of the reader. The graphics like robots and computer screens connects well with the topic of Digital Literacy. In my infographic I have given brief information on the topic of what is digital literacy, digital tools for students, safe internet practices and a small conclusion. This serves as a small yet knowledgeable piece of graphic. The most interesting part of making this infographic was deciding onto the template because the theme is what draws attention.

Task2 - Build Your Student Digital Portfolio

For this task I have created my digital student portfolio in the following below mentioned platforms:

1. **GitHub**- As an engineering student it is important to inculcate the skills of coding and building projects. This platform not only helps in hosting projects to public but also helps in accessing other people's projects which can be helpful in generating ideas.
2. **Research Gate**- As a student in the field of Aerospace, there are constant developments in my field and so to stay connected with the same I hope to gain knowledge in my field by following research papers. On a side note, even I am interested in research so this will be a very helpful platform.
3. **LinkedIn**- It is the most efficient networking platform which helps in finding connects all over the globe. As I have just started my career it is important that I get familiar on how to use it so that in the future I can fetch the necessary knowledge be it finding internships or universities for higher education.

Task3 - Explore Coding & Collaboration Platforms

For this task, I have Google Forms and for question research I have used Google Gemini. These tools came in extremely handy, the interface of Google Forms in extremely user friendly and offers many options for question framing. As for my question selection I have focused on real life based situations which we focus in our day to day environment. As this tests the awareness of the people so the question level is set to basic and medium. While preparing this form I also discovered that I can use google forms for my future assessment, I can keep track of my marks using the pie charts. Apart from AI I have also used websites which provide detailed questions on the topic of digital literacy as well as offer cases studies.

Task4 - Draft a Professional Email & Etiquette Guide

Part A- Write two professional emails

Email 1 — Write an email from a student to their professor requesting an extension on an assignment submission deadline. The email must follow all professional email rules.

Subject: Request for deadline extension for assignment – *Module2 Derivations* due March 2nd April

Dear Professor,

My name is Garvita Srivastava a first-year student in your Introduction to Aerospace Engineering class, course code – ASE2009

I am writing to respectfully ask if I may be granted additional time for the assignment titled *Module2 Derivations* originally due on 2nd April. Unfortunately, I am behind with this assignment because of the project exhibition whose deadline coincided with the assignment's deadline.

I would hope to be able to complete this assignment by 5th April. I hope you will consider my request and I look forward to hearing from you at your convenience.

Kind regards

Garvita Srivastava

ASE2009, Slot – C11 + C12

Email 2 — Write an email from a student to an internship coordinator at a company, expressing interest in a summer internship opportunity.

Subject: Application for Summer Internship at XYZ Organization.

Dear Hiring Manager,

I hope that this message finds you in the best of spirits and health.

I am writing to express my interest in the summer internship opportunities available in your prestigious organization. I am Garvita Srivastava currently studying and pursuing my BTech degree in Aerospace from VIT BHOPAL University.

I am interested in gaining experience in the field of space vehicle design and satellite telemetry and I have ought to know that your organization is an excellent place to do so. I have also acquired skills in CAD/CAE modelling, simulation software like ANSYS, MATLAB. During my coursework I have also gained knowledge in the field of propulsion systems, thermodynamics and theoretical physics. I want to apply my gained knowledge in the practical aspects of working.

I would be grateful if I could be considered for the summer internship program in your organization. I have also included my resume with this email and look forward to hearing from you soon.

Thank you for your time and consideration.

Sincerely Yours,

Garvita Srivastava

Phone Number-905xxxxxxx

Part B - Create a Social Media Do's and Don'ts checklist

DO's	DON'T's
➢ Use privacy settings to control who can see your personal life.	➢ Don't share personal information like your phone number, home address, or daily routine publicly.
➢ Keep your personal profiles private and review your privacy settings regularly on every platform.	➢ Don't plagiarize or steal content without credit
➢ Report harmful, abusive, or fake content using the platform's built-in reporting tools.	➢ Don't accept follow requests from suspicious or bot-like accounts.
➢ Use platform features like Close Friends or viewer selectors to control who sees your content.	➢ Don't use social media during lectures, labs, or group study sessions as it disrupts both you and others who are around you.
➢ Use a professional profile picture and a clean bio on platforms like LinkedIn that recruiters may view.	➢ Don't tag others in embarrassing photos without their explicit permission.
➢ Treat others with the same respect you would in a face-to-face meeting.	➢ Don't engage in cyberbullying or trolling
➢ Turn off non-essential notifications during study hours to maintain focus and reduce distraction.	➢ Don't click on suspicious links or unknown messages

Task5 - Cybercrime Awareness Case Study & Prevention Guide

While conducting research on UPI fraud, what I found to be most surprising was that such scams are quite simple yet effective. The scammers don’t use complex techniques to hack into accounts, but they use the psychology of humans, such as trust, urgency, or lack of knowledge. Even educated people, such as college students, can become victims of such fraud due to their lack of knowledge about how digital payment systems work. One habit that I personally intend to inculcate in my life is to be more careful before accepting any payment request or clicking on any unknown link. I would make sure that I verify the request for payment and also make sure that I am well aware of the action I am performing, especially in financial matters. I would also make sure to spread awareness about various types of cyber frauds to people around me, such as friends and family.

Conclusion

Digital literacy is a fundamental competency in today's highly technologically advanced world. It allows a person to access, analyse, and utilize information in a responsible and efficient manner. In this project, we understand the significance of online safety, critical thinking, and ethical behaviour. Digital literacy not only helps in learning but also helps in becoming successful in our future careers and communicating effectively with the world. It helps us in identifying accurate information and distinguishing it from false information. In general, becoming digitally literate helps us become informed, creative, and confident citizens of the world, contributing to society and becoming successful in this ever-changing world.
